

Amateur Radio is a valuable resource that must be protected.

I am always ready to serve in case of local emergencies using my ham station.

Please note that the present FCC Part 15 limits for this technology already can result in substantial interference potential to amateur frequencies.

BPL systems that radiate on wide swaths of spectrum and that occupy entire neighborhoods have greater interference potential than localized systems, such as switching power supplies or electric motors. This is not a reasonable choice.

You, the FCC have promised to protect licensed users of the spectrum. We expect you to keep this promise.
